Product Overview

The CR-2000 is an inductive contact-less card reader in a metal waterproof housing that also acts as a keypad control. The CR-2000 provides safe secure access control for any combination of 2000 users by the use of the Mifare pass card or individual user pass codes.

The CR-2000 has low power consumption (30mA standby) luminous keypad for nighttime use, Short circuit protection, tamper alarm output, and the Wiegand output for monitoring of user access.

The CR-2000 may also be used stand alone for access control of doors, gate and barrier arms.

Features

- Low 30 mA standby current
- Luminous keypad: for nighttime operation
- 2000 user support
- Independent password support (may use code or card for access)
- Keypad user delete (for lost or stolen cards or codes)
- Output short circuit protection
- Wiegand output: Wg26 for cards
- Tamper alarm output
- Doorbell button: Independent from circuit works with any doorbell
- User pass card code change (allows user to use code they can remember in case card is lost or forgotten)

Indicators and Controls

Operation State	Red LED	Green LED	Beeper	Notes
Standby	Slow Blink	Off		
Key Activation			Beep	
Success	Off	On	Long Beep	
Fail			3 Short Beeps	
Enter Programming	On	Off	Long Beep	Indicator is Orange
Set Condition	On	On		
Exit Programming	Slow Blink	Off	Long Beep	
Unlock	Off	On	Long Beep	
Alarm	Fast Blink	Off	Alarm Sound	

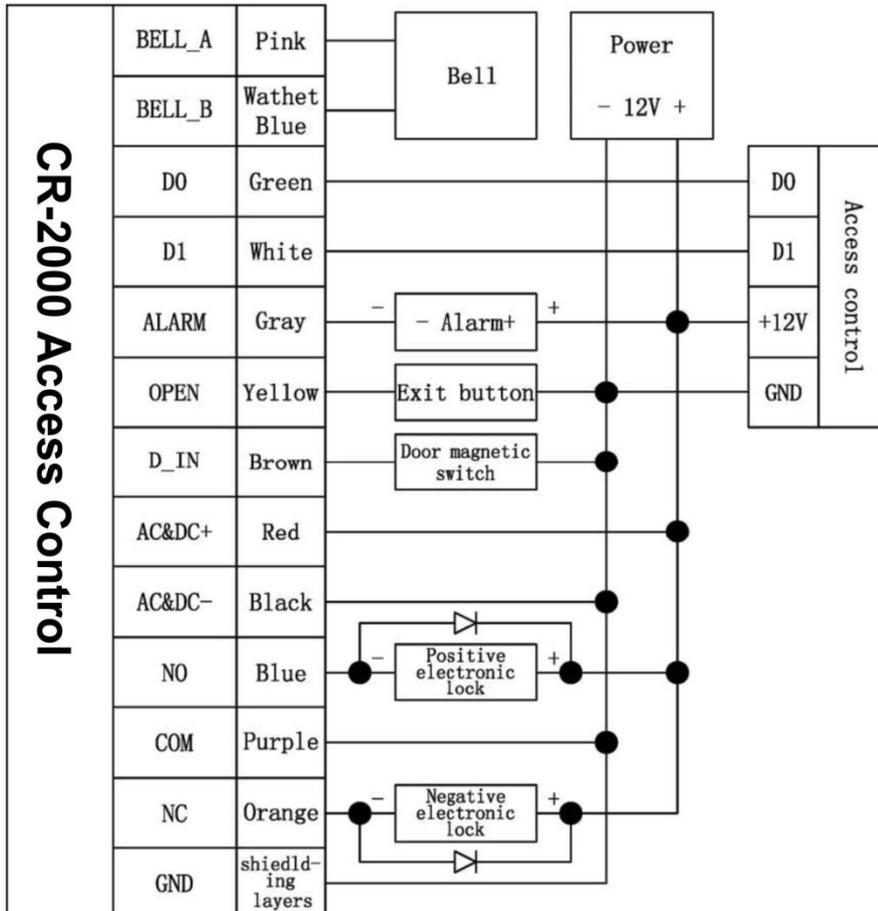

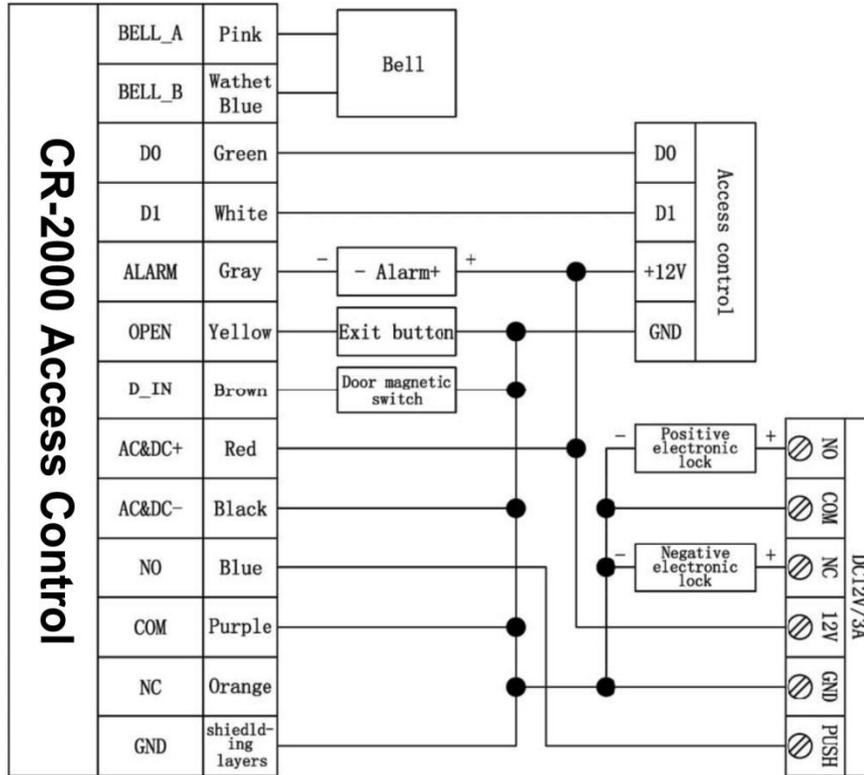

Specifications

Specifications	
Power Supply	9-25VDC
Power Supply Tolerance	+/- 20% of Power Rating
Current Draw Standby	</= 30mA
Read Range	1.1 in (3cm) – 3.1in (8cm)
Capacity (users)	2000 Card and or Pass Codes
Temperature Range	-13°F (-25°C) to 140°F (60°C)
Operating Humidity	10% ~ 90%
Electric Lock Output	</= 3A
Alarm Output	</= 20A
Short Circuit Protection Time	</= 100uS
Activation Time	0-99 Seconds (Adjustable)
Size	4.74in (120mm) x 2.2in(56mm) x 0.71in(18mm)
Certifications	CE

Connections

No.	Designation	Color	Function
1	Bell-A	Pink	Doorbell Terminal A
2	Bell-B	Pale Blue	Doorbell Terminal B
3	D0	Green	WG Output Line (D0)
4	D1	White	WG Output Line (D1)
5	Alarm	Grey	Alarm Negative (Alarm positive connected to +12V)
6	Open	Yellow	Exit Button (Other end of exit button connected to GND)
7	D-IN	Brown	Magnet Switch(Other end of magnet SW connected to GND)
8	AC/DC+	RED	Power 9-25V DC + Input
9	AC/DC-	Black	Power 9-25V DC - Input
10	N/O	Blue	Relay Internal Contact (Normally Open)
11	COM	Purple	Relay Internal Contact (Common)
12	N/C	Orange	Relay Internal Contact (Normally Closed)
13	GND	Shield	Ground (Earth Ground)

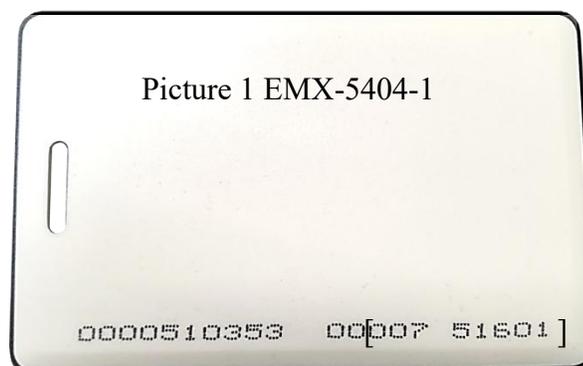

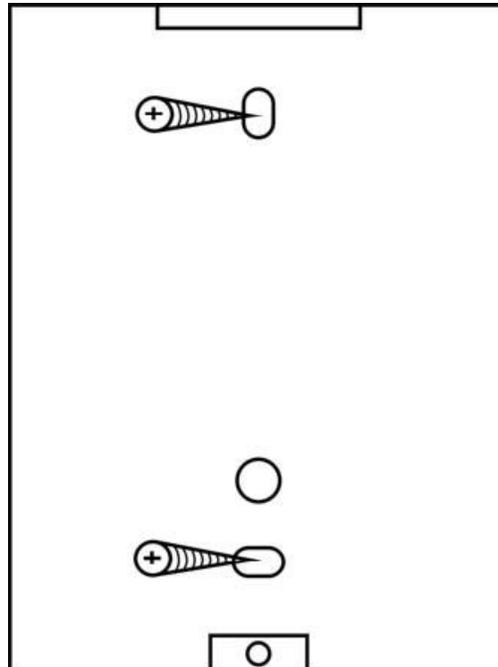

Connections (Continued)

Installation

Find location on mounting surface that has an opening of at least 5 x 2.2 inches.

1. Remove mounting plate from the back of the unit to use as a template for the mounting screws. (Figure 1.0)
2. Drill mounting holes and affix mounting plate to the surface. Also fits to ordinary wall outlet junction boxes.
3. Make sure wires are routed so they are not damaged or shorted
4. Make connections per site requirements see schematics (Figure 2.0, 2.1, 2.2)
5. Install front cover to back cover and tighten unit in place.
6. Proceed to programming

Programming
